SAM learning subscription

Dear Parent / Carer,

The school has purchased a subscription to 'SAM learning' - an online platform that allows teachers to set homework and revision activities across all subject areas. The software allows staff and parents to see the amount of hours students have spent on their work as well as their success rate in each piece of work that has been set. This will allow you to see the progress your child is making when working independently and allows us to support them if they are finding a particular area challenging.

All of the activities on the platform are available to students, without needing to be set by their teacher. This means that students can use the activities for revision, to test their knowledge on a key topic or simply to extend their learning.

This platform is proven to aid students in making progress when used regularly, so staff will begin setting homework on the system next week to test student accounts. Students will receive login credentials in form time this week so they can familiarise themselves with the system. Please encourage your child to login and access the system so they can alert us to any issues with their login. After half term, teachers will be setting more homework using this software, as students become more familiar with its use.

More information about the product can be found at www.samlearning.com

If you have any further queries about the software please direct them to Mr. Jones.

Yours faithfully

Mr T Macdonald
Headteacher
